

Disaster Supply Checklist

Disaster supply kits come in many types and sizes from individual, to pet, to family, to travel. You should be prepared to take care of yourself for 2 weeks, but you can start small by planning for 7 days. Every kit needs some basic items, many of which you already have around your house. Just gather them together, put them in a bag, and call them your kit! If you are missing a few items, make a trip to the local second-hand or dollar type stores. You will be surprised how inexpensive it is to get prepared!

Basic

BACKPACK

- Water (1 gallon/day for each person)
- Food (lightweight, not salty)
